Education

The University of Alabama, Tuscaloosa, AL
Bachelor of Science in Computer Science

December 2024

Coursework and Personal Projects

CS 484, Introduction to Reinforcement Learning, University of Alabama

- Acquired foundational knowledge of Reinforcement Learning, including key AI principles such as reward-based learning, policy optimization, and agent-environment interactions.
- Implemented multiple reinforcement learning algorithms (Monte Carlo, Proximal Policy Optimization, Reward Shaping).

Personal Project, **dausenmason.com**

- Developed an interactive desktop-style portfolio with Node.js, JavaScript, and TailwindCSS.
- Deployed with AWS and Netlify, gaining experience with DNS routing, cloud infrastructure, and CI/CD.
- Designed terminal-inspired UI with draggable windows and modular apps to showcase projects.
- Created “applications” on the site, providing visitors with details on tech stack, development, and demonstration videos and images.

Personal Project, **NVNTRY**

- Designed and built a personal inventory tracking application using Flutter, as well as Hive.
- Implemented persistent local storage and a user-friendly interface for streamlined CRUD operations.
- Developed hands-on experience with a new tech stack, strengthening foundational programming skills.

Personal Project, **Movemint**

- Prototyped a fast-paced movement game in C++ using OpenGL, simulating momentum-based traversal.
- Implemented low-level graphics rendering, physics calculations, and custom game loop architecture from scratch
- Gained experience with memory management, 2D/3D vector math, and debugging segmentation faults in a custom engine.

Skills

- Languages and Technologies:
 - Languages: C, C++, Python, Java, JavaScript, HTML/CSS, SQL, MongoDB, as well as Bash and Shell scripting.
 - Technologies: Git, AWS, Netlify, Docker, Flutter (Dart), React, and Node.js.
- Experience with AGILE development frameworks, Scrum meetings, CI/CD pipelines, basic DevOps practices.
- Experience with software design, software testing, and software documentation.
- Communication, teamwork, leadership, and adaptability skills.

Work Experience

General Manager, Nocturnal Tavern, Tuscaloosa, Alabama

Feb 2023 - Present

- Lead a team of 10-15 staff to maintain efficient, high-quality service in a fast-paced, high-volume environment.
- Managed inventory, schedules, and orders to ensure operational efficiency and cost control.
